

False Idols (Totem) by Joker and the Thief - Pokerdeck

Venture into a world of Mayan myth and mystery. Deities rule from beyond - or do they? Beware the **False Idols**.

In the shadowed corners of history, where myths intertwine with reality, the enigmatic figures of the Joker and the Thief have danced throughout the ages. They are eternal, omnipresent, yet not immediately recognized. They've presented themselves as the Great Seafarers, on land as the Wayfarers, and in the Wasteland of Dystopia. They have even transcended reality within our Psychonauts series. In the series, **False Idols**, these two mysterious entities play their most daring roles yet - masquerading as the old gods of ancient civilizations.

False Idols is a 100% custom deck of playing cards, from the back designs, all of the aces, the court cards, and jokers. Packaged in a spectacular tuck box complete with foil stamping and embossing - creating a gorgeous, raised texture you can feel.

There are two main editions. The **standard deck** which has the tree tuck box and the **Totem Edition** that has the black box and foil accents on the back of the cards.
