

Vending Machine by Twister Magic

Another classic of magic revisited for modern times by George Iglesias and Twister Magic!

Based on the classic illusion of Square Circle, George has created an automatic distributor capable of showing any item chosen by a spectator.

The magician shows a miniature portable automatic distributor, completely empty inside. Now he invites a member of the public to go on stage with him and shows him the different options of products he can buy from the vending machine; The viewer chooses one, two or three and all articles magically appear inside the box, making his wishes!

A fantastic magic makeup for children and families! He falls back in a super flat way for a comfortable transport and has a super large format!

High resolution printed on quality and laminated materials to ensure long duration, it is made to last.

Content:

1 automatic distributor;

1 special gadget;

20 printed postcards: 14 different postcards printed with numerous commercial products available all over the world, including: Pringles, Fanta, M & M's, Oreo, snickers, skittles, sprites, cheetos, coca cola, water, ritz biscuits, chocolate crunch and doritos. 5 empty cards, so you can easily add your products and items to make you appear inside;

1 Magic Bank credit card for the payment of products by car.

Dimensions of the assembled box:

Height: 29 cm (11.4 inches)

Length: 15 cm (5.90 inches)

Width: 10 cm (3.93 inches)

Get ready to create a magical moment for your audience!
