

## Traveling Pencils by Twister Magic

- 3 Effects in 1 -

Teleport 12 crayons from one place to another: show an empty crayon box and put it aside on the table, or give it to a child who will hold it. Now present another crayon box, containing 12 crayons of different colors. Take one and give it to another child, tell him that you will now teleport all the crayons from one place to another, wave your hand over the crayons and they will disappear in the blink of an eye. Now open the other box to show that all the crayons have traveled, but not the one the child was holding, take it and put it inside to complete the box of 12 crayons.

Make all 12 crayons disappear in the most visual way possible: use one of the boxes to make the most visual disappearance ever created for all 12 crayons on the magic market.

12 crayons Appear in the Box: A classic of magic now proposed to children. Show an empty box of crayons, wave your hand and 12 crayons will appear.

A perfect routine for children's shows, living rooms and stage magic. Ideal for children's magicians, clowns and comedians.

The kit comes complete with two special boxes, crayons, instructional video and everything you need to perform this fun routine.
