

Flick-It by Twister Magic

Manuel Seminar is a young and talented Peruvian magician; During his career he performed several times and has specialized in elaborating tricks as powerful as they are deceptive. Manuel presents us with his first magical Flick-It creation, a very visual and versatile magic make-up makeup which is not only a makeup, but a powerful device that allows you to replace any post-it written with another in the blink of an eye. You can do it in a very visual way or in a discreet and hidden way: you choose!

Multiple effects can be obtained, for example replacing one word with another, moving or animating a drawing, transforming a phrase or a message into a different one, you can also transform a message into a three -dimensional object, such as a banknote, an rubber from chew or other things! The best part is that it is restored in seconds and in the end the post-it is delivered to you so that it can be examined in its entirety!

A perfect EDC makeup for your Close-Up magic, your living room performances and even mentalism, a very portable natural and organic element, also ideal for generating viral videos that will have an impact on your social networks, Instagram, Tiktok and many others!

Effects:

With Flick-it it is possible to obtain many effects, here are some really fantastic ideas to make, but the limit is basically your imagination!

1) From paper to paper:

The magician asks someone to choose a card. So the magician focuses and tries to read in his mind and decides to write a card on a post-it, but when the post is shown, this is not the chosen card. Don't worry, now the magician shakes the block of post-it and in the blink of an eye the written card turns into that choice.

2) banknote that appears:

The magician draws the dollar symbol on a post-it, then shakes the block of post-it and the symbol of the written dollar turns into a real banknote from a dollar. The perfect way to get cash immediately!

3) Card that appears:

The magician asks someone to choose a card. Then with a post-it guess the

chosen card, but wait, there is more! Now shake the block and the written word will turn into a real playing card. This can also be done with a card signed by the viewer.

4) Morphing of the sticks:

The magician shows several cards with different objects, a viewer chooses one, now the magician concentrates and tries to guess the chosen object by drawing it on a post-it. When the magician shows what he designed, it looks like a pile of sticks oriented in various directions without very sense. If now the magician escapes and shakes the flick-it block ,, In a very visual way, all those sticks together form the design of the chosen object: a boat, a car, a toy, a puppet, etc. etc.

5) Joke on paper:

The magician asks someone to choose a card. The magician therefore announces that he will write the spectator's card on the post-it saying: "I will write here ... your card" and does exactly this, showing that now on the post-it it says: "your card", the Spectators laugh, but this time the magician takes a further step forward and, shaking the flick-it block, the post-it instantly transforms into the chosen paper.

6) The blocking of additions:

Perform a classic make -up makeup by transforming four numbers of four figures in the most natural way, each written by the spectators, in other numbers, to summarize them until a final number that incredibly corresponds to your previous forecast.

7) Apparition of chewing rubber:

The magician draws a rectangle on a post-it and writes the word bubble gum on the side. Then he shakes the post-it and the written word turns into a strip of real chewing rubber.

8) Morphing of the dots:

Write many dots on a post-it and with a magical movement they will align perfectly forming a new word, name or design.

9) materialization:

The magician asks someone to choose a card. Now it takes the flick-it block and makes the chosen card appear.

10) Spiritual blackboard:

a modern way to perform mentalism exercises; Instead of using spirit blackboards you can now use flick-it to get these surprising effects.

These are just some of the fantastic ideas and tricks that you can make with Flick-it, the limit is your imagination!

Includes:

- Special flick-it block with post-it inside, ready for use.
- Online video tutorial.
- no rechars are needed (only normal post-its that you can add when you want)

Very simple to make! Made to last!
