

Signature Fusion by Jun Q and JT Magic

Signature Fusion

is a very utility effect for you to carry around every day. The effect is very straightforward: a spectator signs their name on one card, and you sign your name on another. Magically, two signatures fuse together. In addition to your own signature, you can also fuse two spectators' signatures together. The effect is impromptu. It's very natural to perform it in social occasions. You can give the signed 'name card' to your spectators as a unique souvenir. It is also perfect for street magic.

More than just a magic routine, Signature Fusion is a practical tool in your magical arsenal. It allows you to visually make signatures or messages appear or disappear very visually. The only limitation is your imagination.
