

Translocations by David Regal and Tango Magic

David Regal's "**Translocations**" sold out two runs 15 years ago, and it has taken all this time to make the set once again, in limited quantity.

Inspired by John Kennedy's brilliant "**Translocations**," coins from three different countries magically transport from one place to another.

Two full routines are included: The original Translocations routine, plus the newer Magic Castle routine that plays bigger and contains some unique magical phases.

What do you receive when you purchase **Translocations**?

You get a custom five-coin set comprised of:

- A Chinese coin unavailable anywhere else. I was unhappy with the appearance and weight of the existing Chinese coins in the marketplace... so I minted a new coin.
- The hard to find "post coin" that allows a Chinese coin (with a real hole) to appear or vanish at will.
- A matching Sun/Moon coin created for this set.
- A matching English penny.
- A matching, uncirculated Kennedy half dollar.

David fully explains the coins and the two routines in a video tutorial.

Bonus: For those who wish to use the post coin to perform Tommy Wonder's "Socked Coins," David explains how that can be done (he does not explain the Wonder routine itself as it is not his to explain - it is available on the Tommy Wonder "Visions of Wonder" videos).

Note: The retail price of this run is lower than the original price of the set.
