

Spectral by Adriano Zanetti

Do you like the ashes in the hand?
Are you a fan of the Double Cross?

Then get ready for **Spectral**, the perfect blend of these two legendary effects.

Imagine this:

You're performing strolling magic. You approach a group and ask a spectator to help. You have them choose a hand and close it into a fist.

You borrow a fork from the table, take a lighter from your pocket, and heat the fork's prongs. Explaining the concept of voodoo, you bring the hot fork close to your own hand and ask the spectator if they've felt anything.

When they open their hand, they see a perfect imprint of the fork's four prongs marked on their palm, as if burned into ashes.

Spectral takes the beauty of fire and ashes and combines it with the power to imprint a lasting mark in the spectator's hand. Imagine the reaction when they open their palm to find a precise, haunting image burned into their skin, an experience they'll never forget!

With a **specially crafted gimmick** designed to fit any mini-Bic lighter, **Spectral** is always ready to go.

- Perfect for strolling magic, fitting right in your pocket.
- Ideal for parlor settings, where the audience feels the magic through the spectator's unforgettable reaction.

Easy, practical, and insanely powerful, **Spectral** will become your new everyday carry. Deliver stunning visuals, profound emotions, and memories that last a lifetime—all with a single tool.
