

EDC Squared by Mark Traversoni

The Magic Square is a CLASSIC of magic and now you have the chance to perform it anywhere and everywhere you go, with no memory work or complex maths.

These beautifully designed 'Astrology Cards' do all the hard work for you, fold in half to business card size and pop straight in your wallet ready to perform with.

New or existing fans of the Magic Square can use these classy cards in their routines with or without using the crib that's hidden in plain sight.

You get 20 in a pack.

Fill them in, blow their minds and give them away as incredibly powerful souvenirs they'll keep forever. Or wipe them clean (both dry erase and sharpie ink come off) and reuse them for repeat performances.

What is the Magic Square?

The Magic Square is the effect that makes you feel like Albert Einstein. If you've never performed it before then you are missing out. It is a truly mind-blowing mathematical phenomenon, yet you don't even need to be good at adding up - your audience can add up the numbers for you.

- Your spectator thinks of a 2-digit number
- You take out a 4 x 4 grid and based on your intuition start filling in the boxes with a load of seemingly random numbers.
- In what feels like the stars coming together, all the rows of numbers in every single combination: vertical, horizontal and diagonal (in fact any symmetrical combination) add up to your spectator's number.

EDC Squared:

- Receive 20 x Magic Square cards
- Easy to learn
- No memory work
- Simple crib to 6 different magic square layouts hidden in plain sight on grid.

- Can be instantly repeatable for the same audience with completely different results.
- Expert teaching from Mark Traversoni
- Number Peek and No Peek versions
- Real world performances from iNFiNiTi
- Part of your everyday carry
