

L Oil and Water (Blue) by Long Long & Bacon Magic

Bacon Magic launched close-up magician Long Long's innovation - "Chameleon". This gimmick is inspired by the classic card magic **Oil & Water** and integrates the modern magic design concept to achieve the visual miracle of double-dimensional "separation effect" between the card face and the card back for the first time.

Long long is a benchmark figure in the field of close-up magic in China, both a magician and a prop designer dual identity. When he created "Chameleon", he hoped to create a magic that would allow the audience to see the synchronous separation of the color of the card face and the color of the card back at the same time, and realize the synchronous separation of the red and black card face and the red and blue card back!

Core Highlights of L Oil and Water Tutorial:

- **The first "Dual-Dimensional Separation":** Red/blue card backs and red/black card faces split simultaneously, repeatable for maximum astonishment.
- **Instant Color Transformation:** Insert a black card into red cards, flick the corner, and watch all faces instantly unify in color.
- **Full-Deck Purification in a Snap:** A single snap cleanses the entire deck- red/black suits separate while red/blue backs split, maximizing visual impact.
- **Crafted with Authentic Bicycle Cards:** Visually deceptive yet effortlessly operable.

Attention: L Oil and Water Red and Blue are only different in the card case, the cards inside are the same.
