

The Nature Bag By TCC & Casey Tang

Four cloth bags with new, secret, and easily recognizable marking systems. Comes with 7 mentalism routines and provides endless possibilities.

After research and repeated practice, Casey Tang gained a lot of experience and finally launched this brand-new product with **TCC - The Nature Bag**. The secret lies in the bags. The key to accomplishing this magic trick is how the magician can quickly grasp the information inside the disorganized bags. They look like common black cloth bags in life but have a new, highly secretive, and quickly recognizable marking system.

In addition to pens, it can be used with playing cards, ESP cards, or any DIY items. Through this marking system, you can easily grasp any information inside the cloth bag, thus accomplishing a series of psychic magic routines such as mind reading, sensing, and prediction.

Apart from being more discreet and recognizable than other marking systems, it is the exclusive magic routines that is the core and the most valuable highlight of the product. After designing **The Nature Bag**, Casey Tang developed a series of proprietary routines for them. A variety of peeking methods and seven complete routines are offered in the tutorials, including Night Watch, Insight, Telepathy, two different Color Match routines, Super Prediction, and Chair Test.

All routines are filled with the sense of wonder and drama unique to mentalism. Most importantly, all items, including pens, cards, and bags, can be inspected by the audience before and after the show, ensuring no suspicion.

In short, it is a highly scalable product that allows you to develop more personalized processes through your exploration. **The possibilities of the Nature Bag are endless!**

Features

- New, discreet, and easily recognizable marking system.
- With high audience participation and freedom of choice, the routines are very dramatic.
- High expandability with various items like pens, cards, and DIY materials.
