

Super Tic Tac Coin by André Previato and RH

Here it is, perhaps what could be the last step, the last level for coins through tic tac.

André Previato and RH worked 100% together to create and develop this trick.

When you stop to imagine how this happens, what comes to mind is that this would be impossible to happen.

Let's get to the trick, a common coin is signed and returned to the magician, who then, in a pass, makes the coin disappear from his hands, and soon appears inside a Zip Lock bag that is inside a Tic Tac box and that this Tic Tac box could still be inside a playing card box, and of course yes, the magician hands over the tic tac box with the signed coin inside, so that the spectator can examine it and verify that the box is intact without any opening and with the coin that he signed inside.

What just happened seems impossible, everyone witnessed that it really did happen, then the magician opens the tic tac box and hands the signed coin back to the spectator.

"I really can't imagine any Tic Tac coin trick better than this one, it's definitely the true ultimate for coins through Tic Tac."

- André Previato

Let's get to the points

- Borrowed and signed coin (no exchanges)
- Examinable Tic Tac box (you can use any Tic Tac box of your choice)
